CHESS GAME RESULT

- Draw

Analysis:

ON chess board white was acting as User-AI and Black was acting chess.com AI simple forward moves were performed initially by both AI's but the chess AI was defensive as it can be seen in the above result picture user AI was in a winning position captured chess-AI two pieces including one knight. But at 22nd move both AI started to move one piece forward and backward game resulted in draw. Chess-AI gave up and initiated a draw.
